Appendix I - Regulatory capital disclosures

INTRODUCTION TO THE CENTRAL BANK OF BAHRAIN'S BASEL III GUIDELINES

The Central Bank of Bahrain (CBB) Basel III Guidelines, based upon the Bank of International Settlements (BIS) Revised Framework – 'International Convergence of Capital Measurement and Capital Standards', are applicable from 1 January 2015. Basel III is structured around three 'Pillars': Pillar I - Minimum Capital Requirements; Pillar II – the Supervisory Review Process and the Internal Capital Adequacy Assessment Process (ICAAP); and Pillar III - Market Discipline.

Group Structure

The public disclosures under this section have been prepared in accordance with the CBB Rules concerning Public Disclosure Module ("PD"), section PD-1: Annual Disclosure Requirements. The disclosures under this section are applicable to Ahli United Bank B.S.C. (the "Bank"), which is the parent bank incorporated in Bahrain. The Bank operates under a retail banking license issued by the CBB. The Bank and its subsidiaries (as detailed under note 2 to the audited consolidated financial statements) are collectively known as the "Group".

Pillar I – Minimum Capital Requirements

Pillar I deals with the basis for the computation of the regulatory capital adequacy ratio. It defines the calculation of Risk Weighted Assets (RWAs) for credit risk, market risk and operational risk, as well as the derivation of the regulatory capital base. The capital adequacy ratio is then calculated as the ratio of the Bank's regulatory capital to its total RWAs. All Bahrain incorporated banks are currently required to maintain a minimum capital adequacy ratio of 12.5%. This includes, mandatory Capital Conservation Buffer (CCB) of 2.5%.

The Group ensures that each subsidiary maintains sufficient capital levels for their respective legal and compliance purposes.

Credit risk

Basel III provides two approaches to the calculation of credit risk regulatory capital. The Standardised approach which the Bank has adopted, requires banks to use external credit ratings to determine the risk weightings applied to rated counterparties, and groups other counterparties into broad categories and applies standardised risk weightings to these categories.

Market risk

The Bank has adopted the Standardised approach for determining the market risk capital requirement.

Operational risk

Under the Basic Indicator approach (BIA), which the Bank has adopted for operational risk, the regulatory capital requirement for operational risk is calculated by applying a co-efficient of 15 per cent to the average gross income for the preceding three financial years.

Pillar II – The Supervisory Review and Evaluation Process

Pillar II involves the process of supervisory review of a financial institution's risk management framework and its capital adequacy.

Accordingly, this involves both the Bank and its regulators taking a view on whether additional capital should be held against risks not covered in Pillar I. Part of the Pillar II process is the Internal Capital Adequacy Assessment Process (ICAAP) which is the Bank's self assessment of risks not captured by Pillar I.

As part of the CBB's Pillar II guidelines, each bank is required to be individually reviewed and assessed by the CBB with the intention of setting individual minimum capital adequacy ratios. The Bank is currently required to maintain a 12.5 per cent minimum capital adequacy ratio at the Group level.

Pillar III – Market Discipline

The third pillar is related to market discipline and requires the Bank to publish detailed qualitative and quantitative information of its risk management and capital adequacy policies and processes to complement the first two pillars and the associated supervisory review process. The disclosures in this report are in addition to the disclosures set out in the audited consolidated financial statements of the Group for the year ended 31 December 2016.

PILLAR III QUANTITATIVE AND QUALITATIVE DISCLOSURES

For the purpose of computing regulatory minimum capital requirements, the Group follows the rules as laid out under the CBB Rulebook module Capital Adequacy (CA) Module. Accordingly,

- a) All subsidiaries as per note 2 to the audited consolidated financial statements are consolidated on a line by line basis in accordance with International Financial Reporting Standards (IFRS). Non-controlling interest arising on consolidation is incorporated under respective tiers of capital as per CBB rules (Subject to Basel III transitional rules)
- b) Investments in associates as reported under note 10 to the audited consolidated financial statements are treated as "Significant Investment in financial entities". They are risk weighted and deducted from Capital as per CBB Basel III guidelines (subject to CBB and Basel III transitional rules)
- c) Goodwill and Intangibles (subject to transitional rules) are deducted from Tier 1 capital;
- d) Subordinated term debt, as reported under liabilities in the consolidated balance sheet, are reported as part of Tier 2 capital, subject to maximum thresholds and adjusted for remaining life;
- e) Collective impairment provisions to the extent of maximum threshold of 1.25% of Credit Risk Weighted Assets are included under Tier 2 capital.

Pillar III Disclosures - Basel III

31 December 2016

1. CAPITAL STRUCTURE

TABLE - 1

A. NET AVAILABLE CAPITAL	US\$ '000		
	CET 1	AT 1	Tier 2
NET AVAILABLE CAPITAL	3,349,045	574,064	543,110
TOTAL ELIGIBLE CAPITAL BASE (CET 1 + AT 1 + Tier 2)			4,466,219
RISK WEIGHTED EXPOSURES			
Credit Risk Weighted Exposures			24,082,344
Market Risk Weighted Exposures			278,900
Operational Risk Weighted Exposures			1,789,913
TOTAL RISK WEIGHTED EXPOSURES			26,151,157
CET 1 & Capital Conversion Buffer (CCB)			12.8%
Tier 1 - Capital Adequacy Ratio (CET 1, AT 1 & CCB)			15.0%
Total - Capital Adequacy Ratio			17.1%

As part of the Basel III implementation, Central Bank of Bahrain (CBB) has revised the public disclosure requirements module [PD Module - Chapter PD-3.1.5A: Quarterly Disclosure Requirements] and incorporated additional disclosure requirements related to regulatory capital.

In line with above requirements, the Group has disclosed the regulatory capital reconciliation and other related disclosures in Appendix I which forms part of Pillar III disclosures for the year ended 31 December 2016.

B. CAPITAL ADEQUACY RATIO

As at 31 December 2016, the capital adequacy ratio under Basel III unless mandated otherwise were:

	Subsidiaries			
	Ahli United Bank K.S.C.P. (AUBK)	Ahli United Bank (U.K.) PLC (AUBUK)	Ahli United Bank (Egypt) S.A.E. (AUBE)*	Commercial Bank of Iraq P.S.C. (CBIQ)**
Tier 1 - Capital Adequacy Ratio	17.0%	24.2%	12.9%	689.7%
Total - Capital Adequacy Ratio	18.2%	25.7%	13.6%	728.8%

* under Basel II

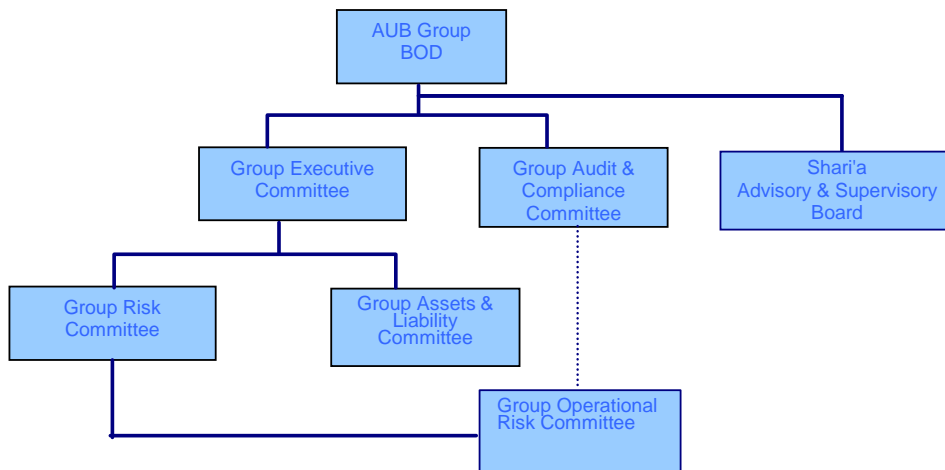

** under Basel I

2. GROUP RISK GOVERNANCE STRUCTURE

Risk Governance

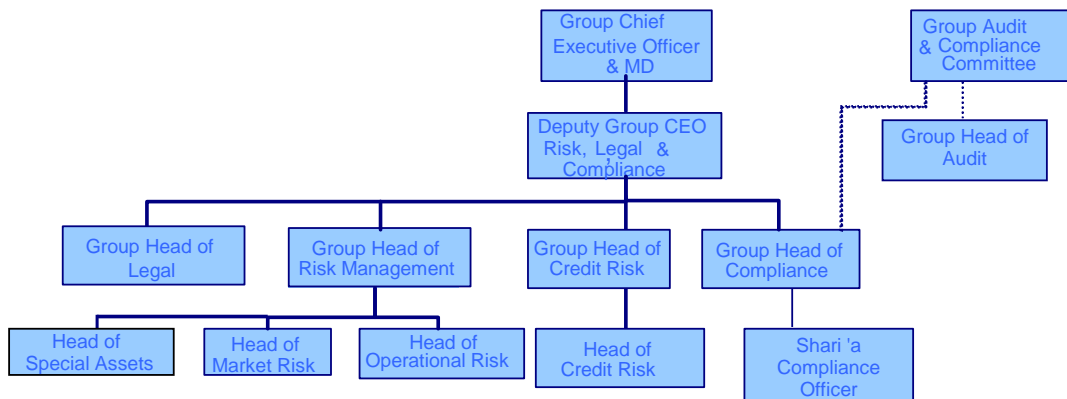

The Group Board of Directors (BOD) seeks to optimise the Group’s performance by enabling the various Group business units to realize the Group’s business strategy and meet agreed business performance targets by operating within the agreed capital and risk parameters and Group risk policy framework.

AUB Group Risk Governance Structure

The above Group committees are set up as part of the Group risk governance structure. The terms of reference for these committees are approved by the Group BOD. Group Audit & Compliance Committee also has oversight over Group Compliance Committee.

AUB Group Management Risk Governance Structure

The Group BOD approves the risk parameters and the Group Risk Committee monitors the Group’s risk profile against these parameters.

The Deputy Group CEO – Risk, Legal and Compliance, under the delegated authority of the Group CEO & MD, supported by the Group Head of Risk Management and the Group Head of Credit Risk has the responsibility for ensuring effective risk management and control. Within Group Risk Management, specialist risk-type heads and their teams are responsible for risk oversight and establishing appropriate risk control frameworks.

Internal Audit is responsible for the independent review of risk management and the Group’s risk control environment.

The Board and its Executive Committee receive quarterly risk updates including detailed risk exposures analysis reports.

The Board approves all risk policies as well as the Group risk framework on an annual basis.

The Group Audit & Compliance Committee considers the adequacy and effectiveness of the Group risk control framework and receives quarterly updates on any control issues, regulatory and compliance related issues.

Systems and procedures are in place to identify, control and report on all major risks.

3. CREDIT RISK MANAGEMENT

Credit risk is the risk of financial loss if a customer or counterparty fails to meet a financial obligation under a contract. It arises principally from lending, trade finance and treasury activities. Credit risk also arises where assets are held in the form of debt securities, the value of which may fall.

The Group has policies and procedures in place to monitor and manage these risks and the Group Risk Management function provides high-level centralized oversight and management of credit risk. The specific responsibilities of Group Risk Management are to:

- Set credit policy and risk appetite for credit risk exposure to specific market sectors;
- Control exposures to sovereign entities, banks and other financial institutions and set risk ratings for individual exposures. Credit and settlement risk limits to counterparties in these sectors are approved and managed by Group Risk Management, to optimize the use of credit availability and avoid risk concentration;
- Control cross-border exposures, through the centralized setting of country limits with sub-limits by maturity and type of business;
- Manage large credit exposures, ensuring that concentrations of exposure by counterparty, sector or geography remain within internal and regulatory limits in relation to the Group's capital base;
- Maintain the Group's Internal Risk Rating framework;
- Manage watchlisted and criticised asset portfolios and recommend appropriate level of provisioning and write-offs;

- Report to the Group Risk Committee, Audit Committee and the Board of Directors on all relevant aspects of the Group's credit risk portfolio. Regular reports include detailed analysis of:
 - risk concentrations
 - corporate and retail portfolio performance
 - specific higher-risk portfolio segments, e.g. real estate
 - individual large impaired accounts, and details of impairment charges
 - country limits, cross-border exposures.
- Specialised management and control of all non-performing assets;
- Manage and direct credit risk management systems initiatives; and
- Interface, for credit-related issues, with external parties including the CBB, rating agencies, investment analysts, etc.

All credit proposals are subjected to a thorough comprehensive risk assessment which examines the customer's financial condition and trading performance, nature of the business, quality of management and market position. In addition, AUB's internal risk rating model scores these quantitative and qualitative factors. The credit approval decision is then made and terms and conditions set. Exposure limits are based on the aggregate exposure to the counterparty and any connected entities across the AUB Group. All credit exposures are reviewed at least annually.

3. CREDIT RISK MANAGEMENT (continued)

Counterparty Exposure Classes

The CBB's capital adequacy framework for the standardised approach to credit risk sets the following counterparty exposure classes and the risk weightings to be applied to determine the risk weighted assets:

<u>Exposure Class</u>	<u>Risk Weighting Criteria</u>
Sovereign Portfolio	Exposures to governments of GCC (refer table 4 for definition of GCC) member states and their central banks {including International organization and Multilateral Development Banks (MDBs)} are zero % risk weighted. Other sovereign exposures denominated in the relevant domestic currency are also zero % risk weighted. All other sovereign exposures are risk weighted based on their external credit ratings.
Public Sector Entity [PSE] Portfolio	Bahrain PSEs and domestic currency claims on other sovereign PSEs [which are assigned a zero % risk weighting by their own national regulator] are assigned a zero % risk weighting. All other PSEs are risk weighted based on their external credit ratings.
Banks Portfolio	Exposures to banks are risk weighted based on their external credit ratings, with a preferential weighting given to short term exposures (i.e. with an original tenor of 3 months or less).
Investment Company Portfolio	Exposures to investment companies which are supervised by the CBB are treated in the same way as exposures to banks but without the preferential short term exposure weighting.
Corporate Portfolio	Exposures to corporates are risk weighted based on their external credit rating. Unrated corporates are 100% risk weighted. A number of corporates owned by the Kingdom of Bahrain have been assigned a preferential zero % risk weighting.
Regulatory Retail Portfolio	Eligible regulatory retail exposures are risk weighted at 75%.
Residential Property Portfolio	Exposures fully secured by first mortgages on owner occupied residential property are risk weighted between 35%-75% based on applicable regulatory guidance.
Commercial Property Portfolio	Exposures secured by mortgages on commercial real estate are subject to a minimum 100% risk weighting, except where the borrower has an external rating below BB- in which case the rating risk weighting applies.
Equities and Funds Investment Portfolio	Investments in listed equities carry a 100%-250% risk weighting. Unlisted equities are 150%-250% risk weighted. Investments in funds are risk weighted according to the type of underlying assets.
Past Due Portfolio	The unsecured portion of any exposure [other than a residential mortgage loan] that is past due for 90 days or more: 150% risk weighted when specific provisions are less than 20% of the outstanding amount; and 100% risk weighted when specific provisions are greater than 20%.
Holdings of Real Estate	All holdings (directly or indirectly) of real estate in the form of real estate companies, subsidiaries or associate companies or other arrangements such as trusts, funds or Real Estate Investment Trusts (REITs) are risk-weighted at 200%. Premises occupied by the bank are weighted at 100%.
Other Assets	All other assets not classified above are risk weighted at 100%

3. CREDIT RISK MANAGEMENT (continued)

External Rating Agencies

The Group uses the following external credit assessment institutions (ECAI's): Moody's, Standard & Poors and Fitch. The external rating of each ECAI is mapped to the prescribed internal risk rating that in turn produces standard risk weightings.

Basel III Reporting of Credit Risk Exposures

As a result of the methodologies applied credit risk exposures presented under Basel III reporting differs in a number of respects from the exposures reported in the consolidated financial statements.

1. As per the CBB Basel III framework, off balance sheet exposures are converted, by applying a credit conversion factor (CCF), into direct credit exposure equivalents.
2. Under the Basel III capital adequacy framework eligible collateral is applied after applying prescribed haircut, to reduce exposure.

Credit Risk Mitigation

The Group's first priority when making loans is to establish the borrower's capacity to repay and not rely principally on security / collateral. Where the customer's financial standing is strong, facilities may be granted on an unsecured basis, but when necessary collateral is an essential credit risk mitigation.

Acceptable forms of collateral are defined within the Group risk framework and conservative valuation parameters are also pre-set and regularly reviewed to reflect any changes in market conditions. Security structures and legal covenants are also subject to regular review to ensure that they continue to fulfil their intended purpose and remain in line with the CBB's prescribed minimum requirements set out in their capital adequacy regulations.

The principal collateral types are as follows:

- in the personal sector – cash, mortgages over residential properties and assignments over salary income;
- in the commercial sector – cash, charges over business assets such as premises, inventories, receivables, debt securities and bank guarantees;
- in the commercial real estate sector – charges over the properties being financed; and
- in the financial sector – charges over financial instruments, such as debt securities and equities.

Valuation of Collateral

The type and amount of collateral taken is based upon the credit risk assessment of the borrower. The market or fair value of collateral held is closely monitored and when necessary, top-up requests are made or liquidation is initiated as per the terms of the underlying credit agreements.

Gross Credit Risk Exposures subject to Credit Risk Mitigations (CRM)

The following table details the Group's gross credit risk exposures before the application of eligible Basel III CRM techniques. The CBB's Basel III guidelines detail which types of collateral and which issuers of guarantees are eligible for preferential risk weighting. The guidelines also specify the minimum collateral management processes and collateral documentation requirements necessary to achieve eligibility.

31 December 2016

TABLE - 2 GROSS CREDIT RISK EXPOSURES

	<i>US\$ '000</i>	
	<i>As at 31 December 2016</i>	<i>Average monthly balance</i>
Balances with central banks	789,422	1,035,117
Treasury bills and deposits with central banks	2,464,846	2,035,101
Deposits with banks	1,884,493	2,548,915
Loans and advances	18,606,883	18,275,847
Non-trading investments	5,429,578	5,212,129
Interest receivable and other assets	385,700	359,266
TOTAL FUNDED EXPOSURES	29,560,922	29,466,375
Contingent liabilities	3,109,597	3,210,297
Undrawn loan commitments	1,130,419	934,944
TOTAL UNFUNDED EXPOSURES	4,240,016	4,145,241
TOTAL GROSS CREDIT RISK EXPOSURE	33,800,938	33,611,616

The gross credit exposures reported above are as per the consolidated balance sheet as reduced by exposures which do not carry credit risk.

TABLE - 3 RISK WEIGHTED EXPOSURES

	<i>US\$ '000</i>			
	<i>Gross exposure</i>	<i>Secured by eligible CRM</i>	<i>Risk weighted exposures after CRM</i>	<i>Capital requirement</i>
Claims on sovereigns	4,967,127	-	367,319	45,915
Claims on public sector entities	966,792	-	761,953	95,244
Claims on banks	4,506,531	133,698	1,991,987	248,998
Claims on corporates	18,204,154	1,425,411	16,422,675	2,052,834
Regulatory retail exposures	1,902,416	37,096	1,398,990	174,874
Residential mortgage exposures	1,434,735	-	641,828	80,229
Equity	383,042	-	933,881	116,735
Investments in funds	40,806	-	55,239	6,905
Other exposures	1,155,545	-	1,508,472	188,559
TOTAL	33,561,148	1,596,205	24,082,344	3,010,293
TOTAL CREDIT RISK CAPITAL REQUIREMENT (STANDARDISED APPROACH)			24,082,344	3,010,293
TOTAL MARKET RISK CAPITAL REQUIREMENT (STANDARDISED APPROACH)			278,900	34,863
TOTAL OPERATIONAL RISK CAPITAL REQUIREMENT (BASIC INDICATOR APPROACH)*			1,789,913	223,739
TOTAL			26,151,157	3,268,895

*Indicator for operational risk exposure is gross income, adjusted for exceptional items, as per BIA. This approach uses average of adjusted gross income for previous three financial years (USD 954,618 thousands) for operational risk computation.

The gross exposure in the above table represents the on and off balance sheet credit exposures before credit risks mitigations (CRM), determined in accordance with the CBB issued Pillar III guidelines. The off balance sheet exposures are computed using the relevant conversion factors.

Under the CBB Basel III Guidelines, banks may choose between two options when calculating credit risk mitigation capital relief. The simple approach which substitutes the risk weighting of the collateral for the risk weighting of the counterparty or the comprehensive approach whereby the exposure amount is adjusted by the actual value ascribed to the collateral. The Group has selected to use the comprehensive method where collateral is in the form of cash or bonds or equities. The Group uses a range of risk mitigation tools including collateral, guarantees, credit derivatives, netting agreements and financial covenants to reduce credit risk.

The Group has an equity investment in insurance subsidiary, Al Hilal Life B.S.C.(c), which is consolidated at the Group level and its assets are risk weighted as per CBB rules.

TABLE - 3 RISK WEIGHTED EXPOSURES (continued)**Concentration Risk**

Refer note 31(a) to the audited consolidated financial statements for definition and policies for management of concentration risk.

As per the CBB's single obligor regulations, banks incorporated in Bahrain are required to obtain the CBB's approval for any planned exposure to a single counterparty, or group of connected counterparties, exceeding 15 per cent of the regulatory capital base. As at 31 December 2016, the Group had no qualifying single obligor exposures in accordance with Central Bank of Bahrain guidelines which exceed 15 percent of the Group's regulatory capital base.

Geographic Distribution of Gross Credit Exposures

The geographic distribution of credit exposures is monitored on an ongoing basis by Group Risk Management and reported to the Board on a quarterly basis.

The following table details the Group's geographic distribution of gross credit exposures as at 31 December 2016.

TABLE - 4 GEOGRAPHIC DISTRIBUTION OF GROSS CREDIT EXPOSURES

Impairment Provisions

The Group Risk Committee regularly evaluates the adequacy of the established allowances for impaired loans.

Two types of impairment allowance are in place:

Individually assessed impairment provisions

These are determined by evaluating the exposure to loss, case by case, on all individually significant accounts based upon the following factors:

- aggregate exposure to the customer;
- the viability of the customer's business model and its capacity to trade successfully out of financial difficulties, generating sufficient cash flow to service debt obligations;
- the amount and timing of expected receipts and recoveries;
- the extent of other creditors' commitments ranking ahead of, or pari passu with the Bank, and the likelihood of other creditors continuing to support the company;
- the realisable value of security (or other credit mitigations) and likelihood of successful repossession;
- the likely dividend available on liquidation or bankruptcy;
- the likely costs involved in recovering amounts outstanding, and
- when available, the secondary market price of the debt.

Collectively assessed impairment provisions

Impairment is assessed on a collective basis as follows:

Incurred but not yet identified impairment:

Individually assessed loans for which no evidence of impairment has been specifically identified on an individual basis are grouped together according to their credit risk characteristics. A collective loan loss allowance is calculated to reflect potential impairment losses estimated at the balance sheet date which may be individually identified in the future.

The collective impairment provision is determined based upon:

- historical loss experience in portfolios of similar credit risk characteristics (for example, by industry sector, risk rating or product segment); and
- judgment as to whether current economic and credit conditions are such that the actual level of inherent losses is likely to be greater or less than that suggested by historical experience.

Balance at 31 December 2016	380,239	316,932

*Net specific charge for the year excludes recoveries from fully provided loans written off in prior years.

Past Due and Impaired Credit Facilities

As per CBB guidelines, credit facilities are placed on non-accrual status and interest income suspended when either principal or interest is overdue by 90 days whereupon unpaid and accrued interest is reversed from income. Interest on non-accrual facilities is included in income only when received. Credit facilities classified as past due are assessed for impairment in accordance with IFRS guidelines. A specific provision is established where there is objective evidence that a credit facility is impaired.

Impaired credit facilities comprise those facilities where there is objective evidence that the Bank will not collect all amounts due, including both principal and interest. Objective evidence would include:

- a breach of contract, such as default or delinquency in interest or principal payments,
- the granting of a concession that, for economic or legal reasons relating to the borrower's financial difficulties, would not otherwise be considered,
- indications that it is probable that the borrower will enter bankruptcy or other financial reorganisation,

Refer to notes 8(a) to 8(d) and note 31(c) to the audited consolidated financial statements for the year ended 31 December 2016 for the distribution of the loans and advances portfolio by quality.

Ratings 1 - 4 comprise of corporate facilities demonstrating financial condition, risk factors and capacity to repay that are excellent to good and retail borrowers where cash collateral [or equivalent such as pledged investment funds] has been provided.

Ratings 5 - 7 represents satisfactory risk and includes corporate facilities that require closer monitoring, and retail accounts which are maintained within generally applicable product parameters.

4. MARKET RISK

Market risk is the risk that movements in market risk factors, including foreign exchange rates, interest rates, credit spreads and equity prices will reduce the Group's income or the value of its portfolios.

Market Risk Management, Measurement and Control Responsibilities

The Board approves the overall market risk appetite and delegates responsibility for providing oversight on the Bank's market risk exposures and the sub allocation of Board limits to the Group Asset and Liability Committee (GALCO). Group Risk Management is responsible for the market risk control framework and for monitoring compliance with the GALCO limit framework.

The Group separates market risk exposures into either trading or non-trading portfolios. Trading portfolios include those positions arising from market-making, proprietary position-taking and other marked-to-market positions. Non-trading portfolios include positions that arise from the foreign exchange/interest rate management of the Group's retail and commercial banking assets and liabilities, and financial assets designated as at amortised cost and fair value through other comprehensive income statement.

Each Group operating entity has an independent market risk function which is responsible for measuring market risk exposures in accordance with the Group Trading Book Policy and the Interest Rate Risk in the Banking Book Policy, and monitoring these exposures against prescribed limits.

Market risk reports covering Trading Book risk exposures and profit and loss are published daily to the Bank's senior management. A risk presentation covering both Trading and Banking Book is also compiled monthly and discussed at the GALCO.

The measurement techniques used to measure and control market risk include:

- Value at Risk (VaR); and
- Stress tests
- Sensitivities and position size related metrics

Daily Value at Risk (VaR)

The Group VaR is an estimate of the potential loss which might arise from unfavourable market movements:

VaR Type	Sample Size	Holding Period	Confidence Interval	Frequency of Calculation
"Management" VaR	260 days	1 day	99%	Daily
"Regulatory" VaR	260 days	10 day	99%	Daily

Daily losses exceeding the VaR figure are likely to occur, on average, either once or five times in every 100 business days depending on the confidence interval employed in the VaR calculation (per the above). The Group routinely validates the accuracy of its VaR models by back testing the actual daily profit and loss results. The actual number of excesses over a given period can be used to gauge how well the models are performing.

4. MARKET RISK (continued)

Although a useful guide to risk, VaR should always be viewed in the context of its limitations. For example:

- the use of historical data as a proxy for estimating future events may not encompass all potential events, particularly those which are extreme in nature;
- the use of a 1-day holding period assumes that all positions can be liquidated or hedged in one day. This may not fully reflect the market risk arising at times of severe illiquidity, when a 1-day holding period may be insufficient to liquidate or hedge all positions fully;
- the use of a confidence level, by definition, does not take into account losses that might occur beyond the applied level of confidence; and
- VaR is calculated on the basis of exposures outstanding at the close of business and therefore does not necessarily reflect intra-day exposures.

The VaR for the Group was as follows:

	<i>US\$ '000</i>		
	<i>Average</i>	<i>Minimum</i>	<i>Maximum</i>
For the year 2016	310	82	770

TABLE - 14 CAPITAL REQUIREMENTS FOR COMPONENTS OF MARKET RISK

	<i>US\$ '000</i>			
	<i>Risk-weighted weighted exposures</i>	<i>Capital requirement</i>	<i>Maximum value</i>	<i>Minimum value</i>
Interest rate risk	188,032	23,504	29,435	20,091

Options & others	336	42	245	42
TOTAL MARKET RISK CAPITAL REQUIREMENT (STANDARDISED APPROACH)	278,900	34,863		

Interest Rate Risk (non-trading)

Interest rate risk is the risk that the earnings or capital of the Group, or its ability to meet business objectives, will be adversely affected by movements in interest rates. Accepting this risk is a normal part of banking practice and can be an important source of profitability and shareholder value. Changes in interest rates can affect a bank's earnings by changing its net interest income and the level of other interest sensitive income and operating expenses. Changes in interest rates also affect the underlying value of the Group's assets, liabilities and off-balance sheet instruments because the present value of future cash flows and / or the cash flows themselves change when interest rates change. The Bank employs a risk management process that maintains interest rate risk within prudent levels.

The Board recognizes that it has responsibility for understanding the nature and the level of interest rate risk taken by the Bank, and has defined a risk framework pertaining to the management of non trading interest rate risk and has identified lines of authority and responsibility for managing interest rate risk exposures.

The Board has delegated the responsibility for the management of interest rate risk to Group Assets Liability Committee (GALCO). GALCO is responsible for setting and monitoring the interest rate risk strategy of the Group, for the implementation of the interest rate risk framework and ensuring that the management process is in place to maintain interest rate risk within prudent levels.

GALCO reviews the interest rate risk framework annually and submits recommendations for changes to the Executive Committee and Board as applicable.

The responsibility for the implementation of the Group's interest rate risk policies resides with the Group Treasurer. An independent review and measurement of all interest exposure present in the banking book is undertaken by the Group Market Risk team and reported to GALCO on a monthly basis.

Interest rate re-pricing reports are based on each product's contractual re-pricing characteristics overlaid where appropriate by behavioural adjustments. Behavioural adjustments are derived by an analysis of customer behaviour over time augmented by input from the business units.

The behavioural adjustments are applied mainly for those liabilities with no fixed maturity dates such as current and savings accounts. These adjustments are based on empirical experience, and current account balances are spread over a maximum period of 3 years while savings accounts are spread over a maximum period of 7 years.

Reports detailing the interest rate risk exposure of the Group are reviewed by GALCO and the Board on a regular basis.

The following table summarizes the re-pricing profiles of the Group's assets and liabilities as at 31 December 2016.

TABLE - 15 INTEREST RATE RISK

Total interest sensitivity gap	3,109,715	(430,795)	(136,530)	
Cumulative interest sensitivity gap	3,109,715	2,678,920	2,542,390	

Interest rate risk sensitivity analysis

The Group's interest rate risk sensitivity is analyzed in note 33(b) to the consolidated financial statements of the Group for the year ended 31 December 2016.

Equity Risk

Equity risk is the risk of changes in the fair value of an equity instrument. AUB Group is exposed to equity risk on non-trading equity positions that are primarily focused on the GCC stock markets. The Board has set limits on the amount and type of investments that may be made by the Bank. This is monitored on an ongoing basis by the Group Risk Committee with pre approved loss thresholds. The Bank's equity risk appetite is minimal.

Valuation and accounting policies:

a) Equity investments held for strategic reasons - investments in associates and joint venture

Associated companies are companies in which the Group exerts significant influence but does not control, normally represented by an interest of between 20% and 50% in the voting capital. The Group classifies its investments as joint venture where it is a party to a contractual joint venture agreement. Investments in associated companies and joint ventures are accounted for using the equity method.

b) Other equity investments

After initial recognition, equity investments are remeasured at fair value. For investments in equity instruments, where a reasonable estimate of the fair value cannot be determined, the investment is carried at cost less impairment provision.

The fair value of equity instruments that are quoted in an active market is determined by reference to market prices at the close of business on the balance sheet date. For equity investments that are not quoted in an active market, a reasonable estimate of the fair value is determined using net present valuation techniques.

For accounting policies on equity instruments please refer to note 3.3(c) (v) of the consolidated financial statements.

TABLE - 16 GAINS ON EQUITY INSTRUMENTS

	<u>US\$ '000</u>
Gains / (loss) recognized in Tier1 Capital (CET1):-	
Unrealized (loss) gains recognized in the balance sheet:	(11,019)
Realized (loss) gains recognized in the equity:	(14,929)

5. LIQUIDITY RISK AND FUNDING MANAGEMENT

Liquidity risk and funding management of the Group have been explained in note 35 of audited consolidated financial statements for the year ended 31 December 2016.

Maturity Analysis of Assets and Liabilities

A maturity analysis of cash flows payable by the Group under financial liabilities by remaining contractual maturities at the balance sheet date is shown in note 35 to the audited consolidated financial statements of the Group for the year ended 31 December 2016.

6. OPERATIONAL RISK

Operational risk is the risk of loss arising from inadequate or failed internal processes, people and systems or from external events, whether intentional, unintentional or natural. This definition includes legal risk, but excludes strategic and reputational risk. It is an inherent risk faced by all businesses and covers a large number of operational risk events including business interruption and systems failures, internal and external fraud, employment practices and workplace safety, customer and business practices, transaction execution and process management, and damage to physical assets.

The Board acknowledges that it has ultimate responsibility for operational risk. Oversight rests with the Group Risk Committee, whilst day to day monitoring is carried out by the Group Operational Risk Committee.

The Operational Risk Management framework has been in place for a number of years and is ingrained in the Group's culture and processes. The Group has developed a comprehensive 'Operational Risk Self Assessment' (ORSA) process.

The Board takes lead in promoting and encouraging a culture of risk awareness and prevention across all areas of the Group. The Group follows a Group Operational Risk Policy approved by the Board. The policy, supported by the Group Operational Risk Framework, aims to ensure that operational risk measures are incorporated into all major aspects of the overall management framework.

The Group Operational Risk Committee is responsible for maintaining an operational risk management framework across the organization. The Committee receives regular reporting on all key operational risk measures. Promptness in resolution of material operational risks identified through Operational Risk Self Assessments and audits are considered as one of the key criteria for performance reviews.

The Group Audit & Compliance Committee assists the Board in ensuring compliance with all regulatory requirements and consistency with best market practices. The Group Audit & Compliance Committee reviews regular reports on all key operational risk measures.

The Group Operational Risk Policy, supported by the Group Operational Risk Framework requires reporting of all material Operational Risk Incidents / Loss Events within a specified period of the occurrence of the event which is followed by an analysis of root cause and its remediation.

The Operational Risk Management Policy requires that internal controls are reviewed and enhanced on an ongoing basis in order to mitigate the residual risks identified through the Operational Risk Self Assessments, analysis of operational loss and near miss events and, internal and external audits. In addition, regular reviews of operating procedures also aim to enhance internal controls. The Group's Human Resources Policy requires that employees are trained regularly so that they are, among others, aware of operational risks and the mitigating controls. The policies require the establishment of appropriate infrastructure and processes for ensuring continuity of business which must be comprehensively and frequently tested for different contingencies.

7. INFORMATION TECHNOLOGY RISK

All computer system developments and operations are centrally controlled and common standard business systems are deployed across the Group wherever possible. Information security is defined through a common 'AUB Group Information Security framework' and is executed through various information security processes and controls that support the framework. The Group follows an enterprise wide approach to business continuity to ensure that all identified critical operations, services and systems are recovered in time in the event of a disruption. The Business Continuity Policy is updated annually and the Disaster Recovery and Business Continuity capabilities are each tested at least once a year and critical systems data are continuously replicated at the disaster recovery site.

8. STRATEGIC RISK

The Board supported by Strategic Development Unit and the Group Finance manages strategic risk on an ongoing basis. The Board receives regular performance reports with details of strategic / regulatory issues as they arise.

9. LEGAL, COMPLIANCE, REGULATORY AND REPUTATIONAL RISKS

Protecting the Legal, Compliance, Regulatory and Reputational Risks of the Group is of paramount importance and all management and staff are expected to apply highest standards of business conduct and professional ethics at all times.

The Group has a dedicated Legal Department whose role is to identify, and provide analysis and advice on the legal risks.

The department is governed by the Group Legal Policy approved by the Board of Directors, which facilitates the management and control of operational risks from pending legal actions, by performing the following tasks:

- Ensuring compliance with applicable legislation and regulation,
- Reviewing and / drafting non- standard contracts and related documentation (including amendments to existing contracts) applicable to the Group,
- periodically reviewing the standard contractual documentation of the Bank, and
- advising on matters involving legal risk and drafting formal communication relating to legal claims involving the Group.

There are no material litigations / claims against the Group as at 31 December 2016

The Board approved policies, including AUB Group Reputation Risk policy, Communications Policy, Personal Account Dealing Policy, Key Person Dealing Policy, Compliance Policy, Anti Money Laundering policy, Banking Integrity and Whistle Blowing Policy & Procedures and Code of Business conduct policy and such other policies prescribes the required standards of ethical behaviour and personal conduct for all staff (including the Bank's Directors), and the Board exercises an oversight of these risks through various management functions, including Legal, Risk Management, Compliance, Human Resources and Internal Audit Department.

10. ENVIRONMENTAL RISK

The Group recognizes the importance of environmental and social issues within its risk framework, and has established a Social and Environmental Management System (SEMS) which details the policy, procedures and workflow that will be followed by the Bank and its subsidiaries / affiliates in respect of environmental risk.

The Group continually endeavours to implement effective social and environmental management practices in all its activities, products and services with a focus on the applicable national laws on environmental, health, safety and social

The Group has adopted the Equator Principles (EP), a globally recognized benchmark for managing social and environmental risks in project finance. EP is an arrangement by financial institutions worldwide to adhere to the environmental, health and safety standards while financing projects.

As such the Group will finance projects only when they are expected to be designed, built, operated and maintained in a manner consistent with the applicable national laws.

APPENDIX I - REGULATORY CAPITAL DISCLOSURES

PD 2 : Reconciliation Of Regulatory Capital

i) Step 1: Disclosure of Balance Sheet under Regulatory scope of Consolidation

There are no differences between the regulatory and accounting consolidation, with both following the line by line consolidation approach as per the IFRS 10 Consolidated Financial Statements without excluding any entities. As mandated by the Central Bank of Bahrain ("CBB"), Loans & Advances and Investments have been grossed up with collective impairment provision, as presented below:

	<i>US\$ '000</i>
Balance sheet per published financial statements	31,322,484
Collective impairment provision	403,681
Balance sheet as in Regulatory Return	31,726,165

ii) Step 2: Expansion of the Balance Sheet under Regulatory scope of Consolidation

	<i>US\$ '000</i>

Other intangibles other than mortgage-servicing rights (net of related tax liability)	26,794	40,192	F1+F2
Deferred tax assets that rely on future profitability excluding those arising from temporary differences (net of related tax liability)	3,444		G1-G2
Cash-flow hedge reserve	(23,783)		C7
Significant investments in the common stock of banking, financial and insurance entities that are outside the scope of regulatory consolidation, net of eligible short positions (amount above 10% threshold)	15,508	23,264	H1 + H2
Total regulatory adjustments to Common equity Tier 1	448,524		
Common Equity Tier 1 capital (CET1)	3,349,045		
Additional Tier 1 capital: instruments			
Directly issued qualifying Additional Tier 1 instruments plus related stock surplus	400,000		I
Additional Tier 1 instruments (and CET1 instruments not included above) issued by subsidiaries and held by third parties (amount allowed in group AT1)	174,064	38,903	J
Additional Tier 1 capital before regulatory adjustments	574,064		
Total regulatory adjustments to Additional Tier 1 capital	-		
Additional Tier 1 capital (AT1)	574,064		
Tier 1 capital (T1 = CET1 + AT1)	3,923,109		
Tier 2 capital: instruments and provisions			
Directly issued qualifying Tier 2 instruments plus related stock surplus	163,063		K
Tier 2 instruments (and CET1 and AT1 instruments not included above) issued by subsidiaries and held by third parties (amount allowed in group Tier 2)	42,761	(21,608)	L
Provisions & Reserves	337,285		M1+M2
Tier 2 capital before regulatory adjustments	543,110		
Total regulatory adjustments to Tier 2 capital	-		
Tier 2 capital (T2)	543,110		
Total capital (TC = T1 + T2)	4,466,219		

RISK WEIGHTED ASSETS IN RESPECT OF AMOUNTS SUBJECT TO PRE-2015 TREATMENT

	98,352	
<i>Of Which: Intangible assets (RW @ 100%)</i>	40,193	
<i>Of Which: Significant Investments (RW @ 250%)</i>	58,160	
Total risk weighted assets	26,151,157	

Capital ratios

Common Equity Tier 1 (as a percentage of risk weighted assets)	12.8%
Tier 1 (as a percentage of risk weighted assets)	15.0%
Total capital (as a percentage of risk weighted assets)	17.1%

Institution specific buffer requirement (minimum CET1 requirement plus capital conservation buffer plus countercyclical buffer requirements plus G-SIB buffer requirement expressed as a percentage of risk weighted assets)	9.0%
--	------

Of Which: capital conservation buffer requirement 2.5%

Of Which: bank specific countercyclical buffer requirement (N/A) NA

Of Which: G-SIB buffer requirement (N/A) NA

National minima (if different from Basel 3)

CBB Common Equity Tier 1 minimum ratio (including buffers)	9.0 %
CBB Tier 1 minimum ratio (including buffers)	10.5%
CBB total capital minimum ratio (including buffers)	12.5%

Amounts below the thresholds for deduction (before risk weighting)

Non-significant investments in the capital of other financial entities	70,782
Significant investments in the common stock of financial entities	359,721

Applicable caps on the inclusion of provisions in Tier 2

Provisions eligible for inclusion in Tier 2 in respect of exposures subject to standardised approach (prior to application of cap)	403,681
Cap on inclusion of provisions in Tier 2 under standardised approach	301,029
